

# INSTRUCTIONS

## 10' Grande Water Wall

### List of Parts Included:

- (2) Pumps
- (2) Inline Filters w/ball valve and quick connect (Male)
- (2) Bags of Rocks
- (2) Rock Trays (one (1) if the fountain is Rear Mounted in the base)

### Step 1

Stand up the water wall.

### Step 2

Screw the inline filters & ball valves to your pumps.

### Step 3

Take the pumps & connect them to each panel using the quick connects. Male on pump, female on panel; screw them together. Run cord out of bulk head at back side of base. These are two holes just below surface of base. NOTE: The lower hole/bulkhead is for the auto drain & fill. DO NOT FILL UNIT ABOVE THIS HOLE. The higher bulkhead is for the electrical cords.

### Step 4

Fill Unit w/ water & plug in pumps. Remember: DO NOT FILL ABOVE LOWEST BULKHEAD ON BACK BASE.

### Step 5

Adjust ball valves to appropriate flow to maximize water flow on surface of glass without causing splashing from the top of the fountain.
